

TANUSHA HANDE

Software Engineer | Java | Spring Boot | Microservices | ReactJS | REST APIs

+91 9699732616 tanushahande0312@gmail.com linkedin.com/in/tanusha-hande-460498284 India

EXPERIENCE

Software Developer

Amdocs

08/2025 - Present Pune, India

Agentic OS

- Engineered an AI-driven Test Automation Agent for telecom applications, accelerating test execution workflows and reducing manual intervention through one-click automation.
- Built Python and Golang microservices to orchestrate automated test workflows, enabling real-time execution monitoring and improving operational efficiency.
- Created responsive ReactJS dashboards and integrated RESTful APIs to provide real-time visibility into test status, execution outcomes, and system analytics.
- Enhanced automation coverage and platform reliability by partnering with product, QA, and engineering teams to deliver AI-driven quality engineering capabilities.

Ginger & Ginger Play

- Developed and enhanced automation testing solutions using Angular, .NET MVC, and REST APIs, improving platform usability and operational efficiency.
- Designed and implemented frontend components, backend business logic, and API integrations to support scalable and maintainable application development.
- Developed Android TV Automation capabilities for automated validation of end-to-end user journeys and device functionality.
- Collaborated with product owners, developers, and QA teams to deliver platform enhancements, modernization initiatives, and performance improvements.

PROJECTS

LifeOS – Multi-Agent Productivity Platform

03/2026 - 06/2026

- Designed and developed a multi-agent AI system to automate career planning, learning recommendations, financial tracking, and startup intelligence.
- Implemented workflow orchestration and agent communication using LangGraph, enabling coordinated task execution across specialized AI services.
- Built a vector-based memory layer using PostgreSQL, Redis, and Qdrant for contextual retrieval, knowledge persistence, and semantic search.
- Implemented local LLM integration using Ollama and open-source models to support intelligent automation and contextual responses.
- Developed an MCP-based integration layer for secure access to files, calendars, notes, and productivity tools.

SUMMARY

Software Engineer with experience in designing and developing full-stack applications using Java, Spring Boot, ReactJS, and REST APIs. Skilled in microservices architecture, SQL/NoSQL databases, CI/CD, and cloud technologies. Proven experience building scalable automation platforms and AI-powered solutions while working in Agile environments. Strong foundation in software design, problem-solving, and delivering high-performance enterprise applications.

EDUCATION

B.Tech (Computer Science & Technology)

Usha Mittal Institute of Technology

CGPA
7.75 / 10.00

2021 - 2025
Mumbai, India

SKILLS

Java Spring Boot Kafka

MySQL Microservices RabbitMQ

SQL Python ReactJS Angular

NET Core TypeScript REST APIs

Golang MongoDB Grafana

Prompt Engineering Docker Git

CI/CD Spring MVC Hibernate

PostgreSQL DSA Postman

Jira AWS Agile methodologies

KEY ACHIEVEMENTS

Backend Performance Boost

Improved microservices response time by 30% via backend optimizations

Enhanced User Engagement

Increased user engagement by 50% with real-time data features
